

KYDZ

OWNER'S GUIDE

Please read entire booklet before assembling KYDZ Suite® products.
Keep this booklet for future reference and add-ons.

The KYDZ Suite line of products and all Jonti-Craft products are intended for use in caring for children of immature judgement; adult supervision is required at all times!

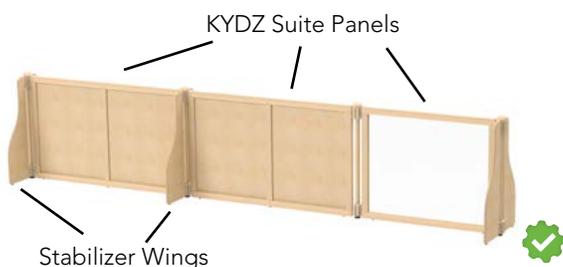

Congratulations on your purchase of the KYDZ Suite products! KYDZ Suite allows you to get creative with your space and you will find it's great for defining and building kid-friendly spaces for playing, learning, and more. With an easy-to-use Tab Mounting Template and Hub Connector Tabs, KYDZ Suite easily connects to most Jonti-Craft products, letting you make the most of what you already have. KYDZ Suite is also GREENGUARD Gold Certified which means you can breathe easy knowing that these products contribute to healthier indoor air quality. This booklet is designed to assist you with properly and safely setting up your KYDZ Suite area and ensuring that you enjoy it for years to come.

Warranty, Cleaning, and Maintenance	Page 18

 The KYDZ Suite line of products and all Jonti-Craft products are intended for use in caring for children of immature judgement; adult supervision is required at all times!

 Never connect more than two KYDZ Suite Panels in a straight line without using KYDZ Suite Stabilizer Wings or without being connected to a stationary Jonti-Craft furniture item.

 To ensure your set-up is stable, Stabilizer Wings and/or Jonti-Craft furniture items should be added when using KYDZ Suite to divide a room. Always place KYDZ Suite Stabilizer Wings (sold in pairs) at 180° compliments, perpendicular to a Panel.

 If Jonti-Craft furniture items or Stabilizer Wings are not used, KYDZ Suite and Jonti-Craft furniture items can be assembled at 45° or 90° angles.

 KYDZ Suite Panels must always be connected at the ends, either to another Panel, a wall (via the KYDZ Suite Wall Adapter), a stationary Jonti-Craft furniture item or a pair of KYDZ Suite Stabilizer Wings.

 The KYDZ Suite Immobilizer Blocks (set of 4) must be used to prevent Jonti-Craft mobile furniture items from moving before attaching the KYDZ Suite Panels to the units. They should be placed next to the wheels on the front and back of the unit.

 Use KYDZ Suite Cascade Panels to connect from S-Height to A-Height, or A-Height to E-Height, or E-Height to T-Height items. Do not attempt to connect different height items together without the use of a Cascade Panel.

 KYDZ Suite Welcome Gates and Welcome Arches must either be connected to KYDZ Suite Panels at an angle other than 180° (straight line) or be connected to a stationary Jonti-Craft furniture item. They can also be supported via a pair of KYDZ Suite Stabilizer Wings on each end. The Welcome Gates and Welcome Arches should be placed on a flat surface with the handle facing outwards, away from the space children primarily occupy.

 The KYDZ Suite Welcome Gate (1550JC) and KYDZ Suite Welcome Arch – Short (1552JC) can only be connected to E-Height options (KYDZ Suite E-Height Hubs, KYDZ Suite E-Height Panels, and 29½" high or taller stationary Jonti-Craft furniture). The KYDZ Suite Welcome Arch - Mini can only be connected to T-Height Options (KYDZ Suite T-Height Hubs, KYDZ Suite T-Height Panels, and 24½" high or taller stationary Jonti-Craft furniture).

 The KYDZ Suite Welcome Gate with Tall Arch (1553JC) and the KYDZ Suite Welcome Arch – Tall (1554JC) can be connected to S-Height, E-Height, or A-Height options. Where possible, the preferred connection is A-Height options (A-Height KYDZ Suite Panels, E to A-Height KYDZ Suite Cascade Panels, or 35½" high or taller stationary Jonti-Craft furniture).

1555JC Welcome Arch - Mini

- 1550JC Welcome Gate
- 1552JC Welcome Arch - Short

- 1554JC Welcome Arch - Tall
- 1553JC Welcome Gate with Tall Arch

 When placing KYDZ Suite Panels above an item like a storage unit, (i.e., Upper Deck Divider) always use specifically assigned kits and follow assembly instructions. In these cases, the bottom unit or Panel must be secured at both sides by using KYDZ Suite Stabilizer Wings, 15" or 18" deep stationary Jonti-Craft furniture items, or connected to a structural wall. Go to page 16 for Upper Deck Divider assembly instructions.

 KYDZ Suite Panels are the same length as most Jonti-Craft units, so they can easily be interchanged with one another.

 KYDZ Suite products are intended for indoor use only.

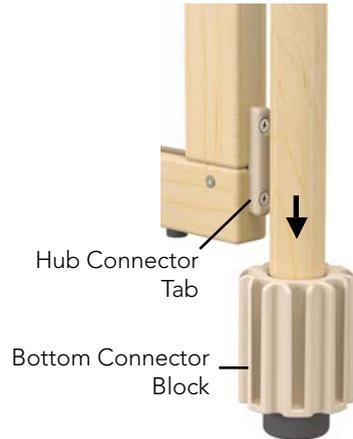

To remove the connector block, first unscrew the top cap by twisting counter clockwise with your hand. Once loose, simply pull off connector block.

To lock Hub, replace connector block. Then retighten top cap by twisting clockwise with your hand.

The Hub is now ready to use.

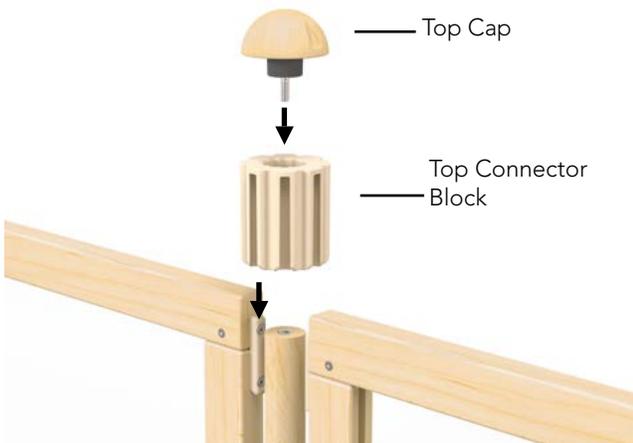

1. Unscrew the top cap of the KYDZ Suite Hub and remove plastic connector block and set aside.

2. Slide the Hub Connector Tab on the bottom of the first Panel into a groove in the bottom connector block.

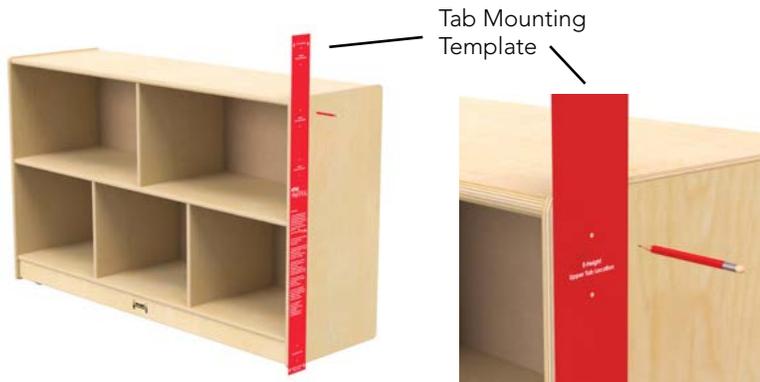

3. Slide the Hub Connector Tab on the second Panel into a groove in the bottom connector block at desired angle.

4. Replace the top connector block by aligning the Hub Connector Tabs on the two Panels with the grooves and the post with the connector block. Screw in the top cap until tight.

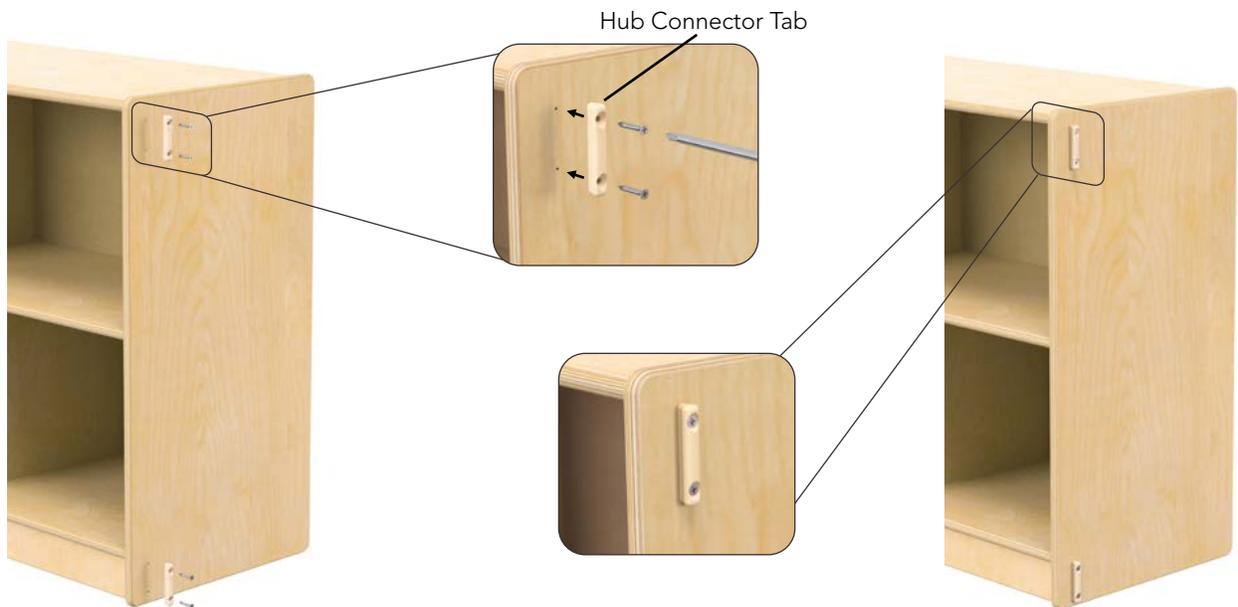

5. Your Panels should look similar to this after they have been connected with the Hub. NOTE: a Hub can be attached to more than two items at a time (i.e., two Panels and two Stabilizer Wings).

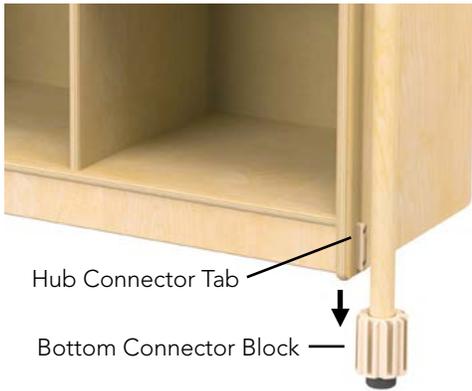

1. To apply Hub Connector Tabs to a Jonti-Craft furniture item, first place the Tab Mounting Template included in your starter kit on the side of the unit as shown. Depending on where the tabs are to be placed, align the edge of the template with the front or rear edge of the furniture item. Mark the holes for the appropriate height Hub Connector Tabs needed. Remove the template and set aside.

2. Drill holes using the $\frac{1}{16}$ " drill bit from the starter kit. NOTE: Drill no deeper than the red of the drill bit. ($\frac{1}{2}$ " deep).

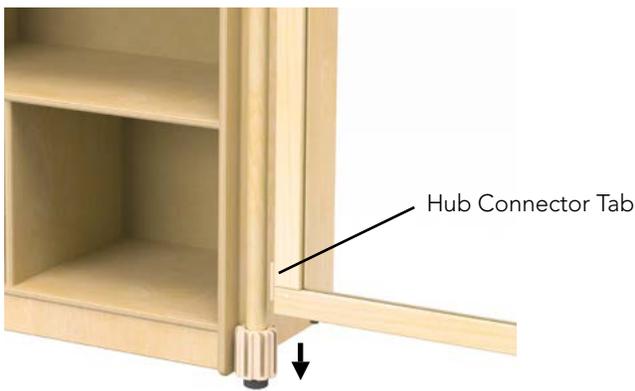

3. Attach the Hub Connector Tabs by inserting two #6 – $\frac{3}{4}$ " flat head screws (supplied) through the holes in each tab and into the drilled holes of the Jonti-Craft furniture item. Tighten using a medium Phillips head screw driver.

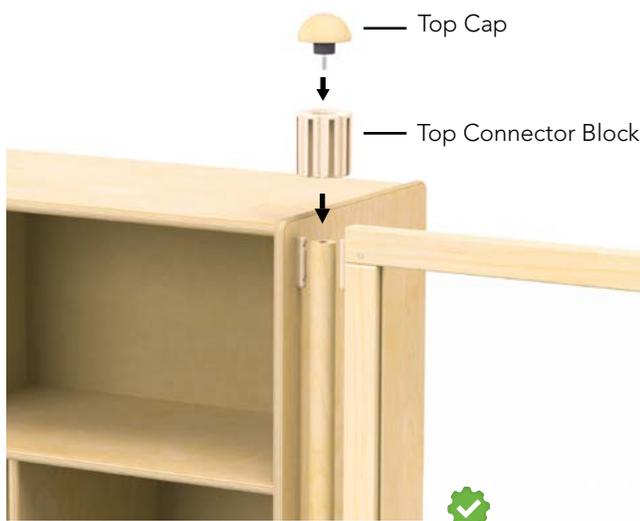

4. Repeat steps to add Hub Connector Tabs to opposite sides or to other units.

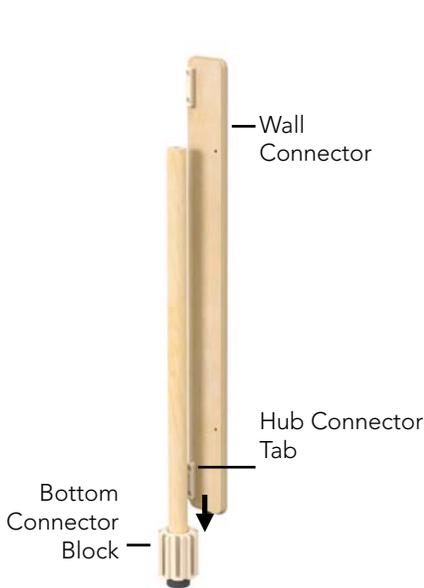

To connect a KYDZ Suite item to a Jonti-Craft furniture item, first follow the instructions on page 10 while using the included Tab Mounting Template. Once the Hub Connector Tabs are in place, slide the unit into a groove in the bottom connector block.

Slide the Hub Connector Tab on the Panel into a groove in the bottom connector block at desired angle.

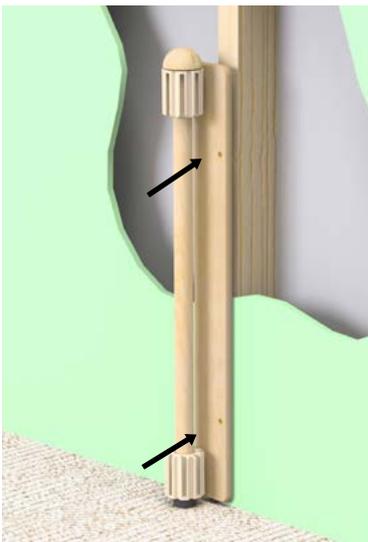

Next, place the top connector block into place and screw the top cap into the post.

1. First unscrew the top cap of the Hub and remove the top connector block. Next, insert the Wall Connector into a groove in the bottom connector block with the Hub Connector Tab.

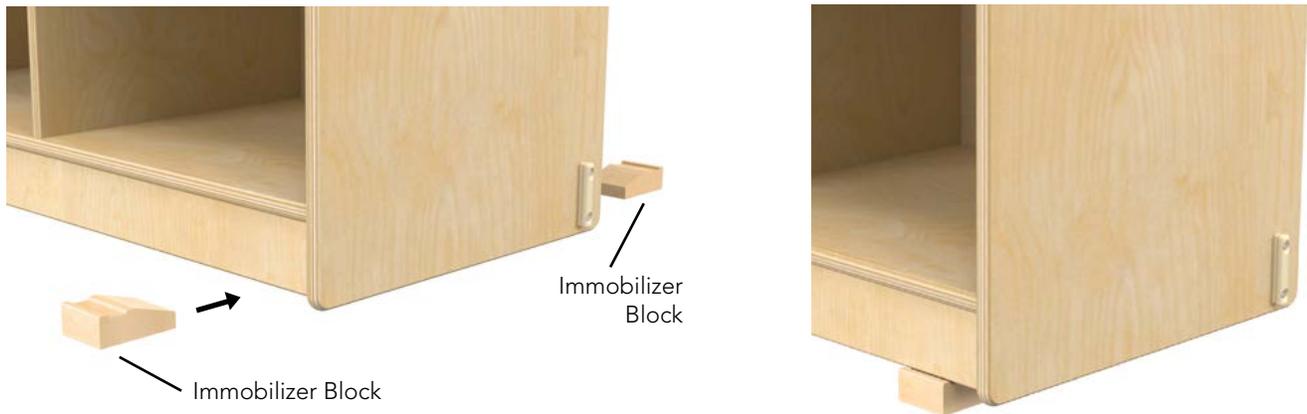

2. Next, replace the top connector block and screw in the top cap.

3. Find a stud in the wall. **NOTE: Wall Connector MUST be attached to a wall stud.**

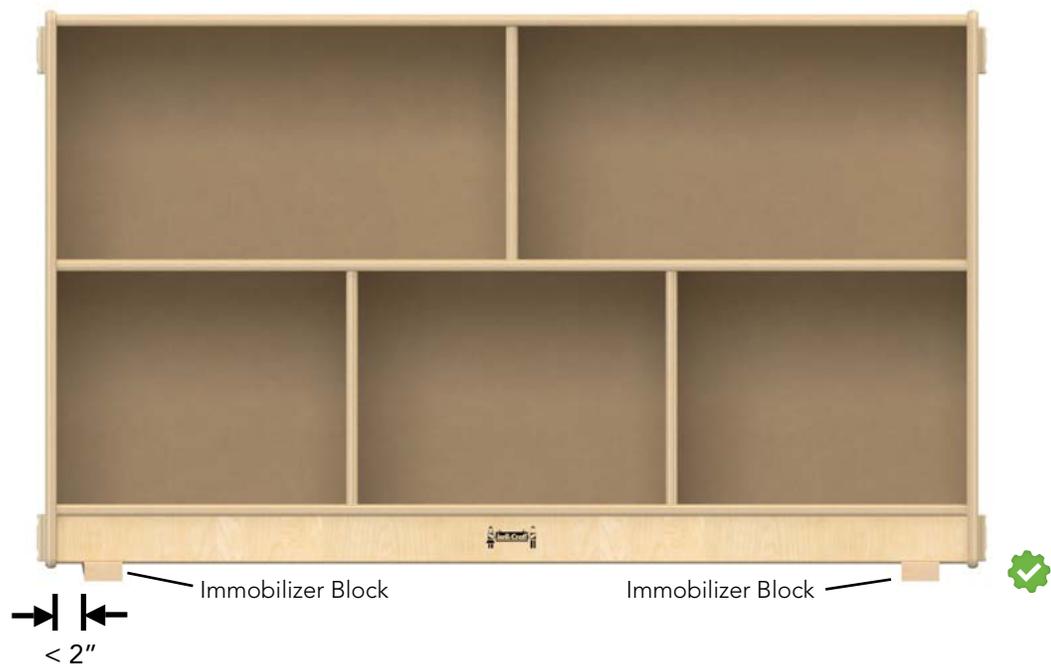

4. Screw in the two supplied #8 – 2½” screws through the holes in the Wall Connector and into the wall. Be sure the screws are securely into the stud. Your Wall Connector is now securely in place.

**NOTE: If the wall has a base trim, a customer-supplied spacer (which is the same thickness as the base trim) must be placed between the wall and the wall connector (above the base trim.) Longer screws may be needed depending on the thickness of the spacer.*

Installing Immobilizer Blocks allows you to convert a mobile Jonti-Craft furniture item to a stationary unit. To insert Immobilizer Blocks under a mobile Jonti-Craft furniture item, slide one block under the base rail in each corner of the storage unit. The unit may need to be lifted slightly. The kickplate or bottom rail of the unit should rest in the groove of the Immobilizer Block.

Immobilizer blocks should be placed no more than 2" from the sides of the unit.

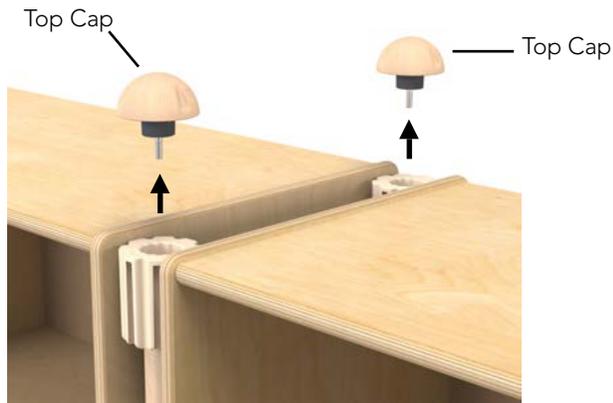

To adjust the Accordion Panel, when standing looking at the knob side of the Panel, loosen the knobs by turning them counter clockwise. NOTE: Do NOT fully remove knob, loosen just enough to slide Panels (about 1½ full rotations).

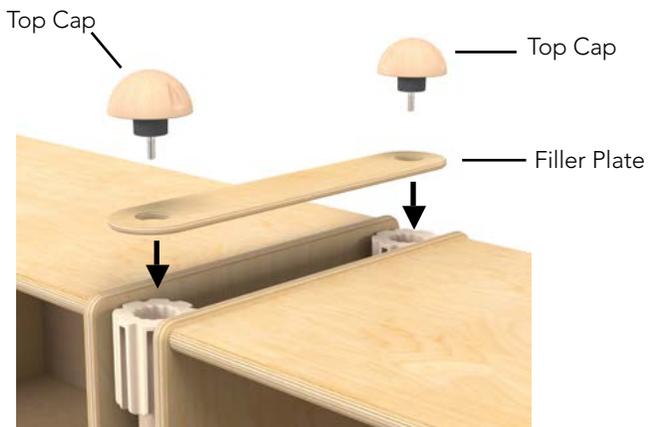

Slide Accordion Panel to desired length. Tighten knobs to lock Panel into place by turning knobs clockwise (about 1½ full rotations). Follow instructions on page 9 to attach an Accordion Panel to other KYDZ Suite items and page 11 to attach to Jonti-Craft furniture items.

CAUTION: To prevent children from playing with the knobs, face side of Panel with knobs outward, away from the space children primarily occupy.

If installing a Filler Plate, remove the top caps of the Hubs.

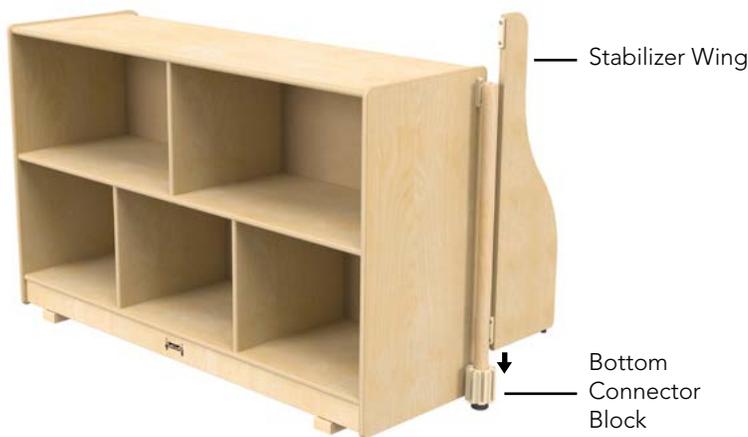

Place the Filler Plate over the top connector blocks. Reinsert the top caps and tighten.

There should no longer be a space between your Jonti-Craft units.

1. First attach Hub Connector Tabs to rear of the Jonti-Craft furniture item on both sides by following directions on page 10. Then attach Hub (without top cap and top connector block) to the mounted Hub Connector Tabs at the rear of the unit. Repeat for other side.

2. Next insert a Stabilizer Wing into a groove in the bottom connector block of each of the Hubs.

3. Now place the top connector block into place.

4. Screw in the provided threaded rod so 1½" sticks out of the top connector block. Place the bottom connector block over the threaded rod and screw on the wood dowel until tight. Repeat for other side.

5. Next, connect the Panel by aligning the Hub Connector Tabs and the connector blocks. Panel should rest on top of the storage unit.

6. Place the top connector blocks over the Hub Connector Tabs on the Panel and screw in the top cap from the Hubs.

7. Your Upper Deck Divider is now ready for use.

WARRANTY

KYDZ Suite products feature Jonti-Craft's Lifetime warranty. KYDZ Suite items are covered from material defect and quality of workmanship, absent any misuse, abuse or normal wear and tear. Any modification to the original KYDZ Suite product, any use not compliant with published KYDZ Suite guidelines or connecting KYDZ Suite products to non-Jonti-Craft brand products voids this warranty. For full and detailed warranty information or to submit a warranty claim, please contact Jonti-Craft at 507.342.5169.

CLEANING + MAINTENANCE

- **Maple (finished)** – Use a furniture cleaner, such as Endust®, and wipe with a soft, clean cloth.
- **Plywood (finished)** – Use a furniture cleaner, such as Endust®, and wipe with a soft, clean cloth.
- **Write-n-Wipe** – Use glass cleaner and a soft, clean cloth. For unintentional permanent marks, use a soft cloth dampened with isopropyl alcohol.
- **Magnetic Write-n-Wipe** – Wipe with a light, damp, clean cloth.
- **Mirror** – Use a mild dish washing detergent and water on a soft, clean cloth. Do not use glass cleaner.
- **See-Thru** – Use a mild dish washing detergent and water on a soft, clean cloth. Do not use glass cleaner.
